Selected Projects

1

ARCH 401 [RESIDENTIAL]

Low Income Housing & Green Development
27 Holzmarktstrasse, Mitte
Berlin, Germany

2

ARCH 302 [MIXED]

5-Story Artisan Work/Live Community
451 Lafayette Ave
Brooklyn, NY

3

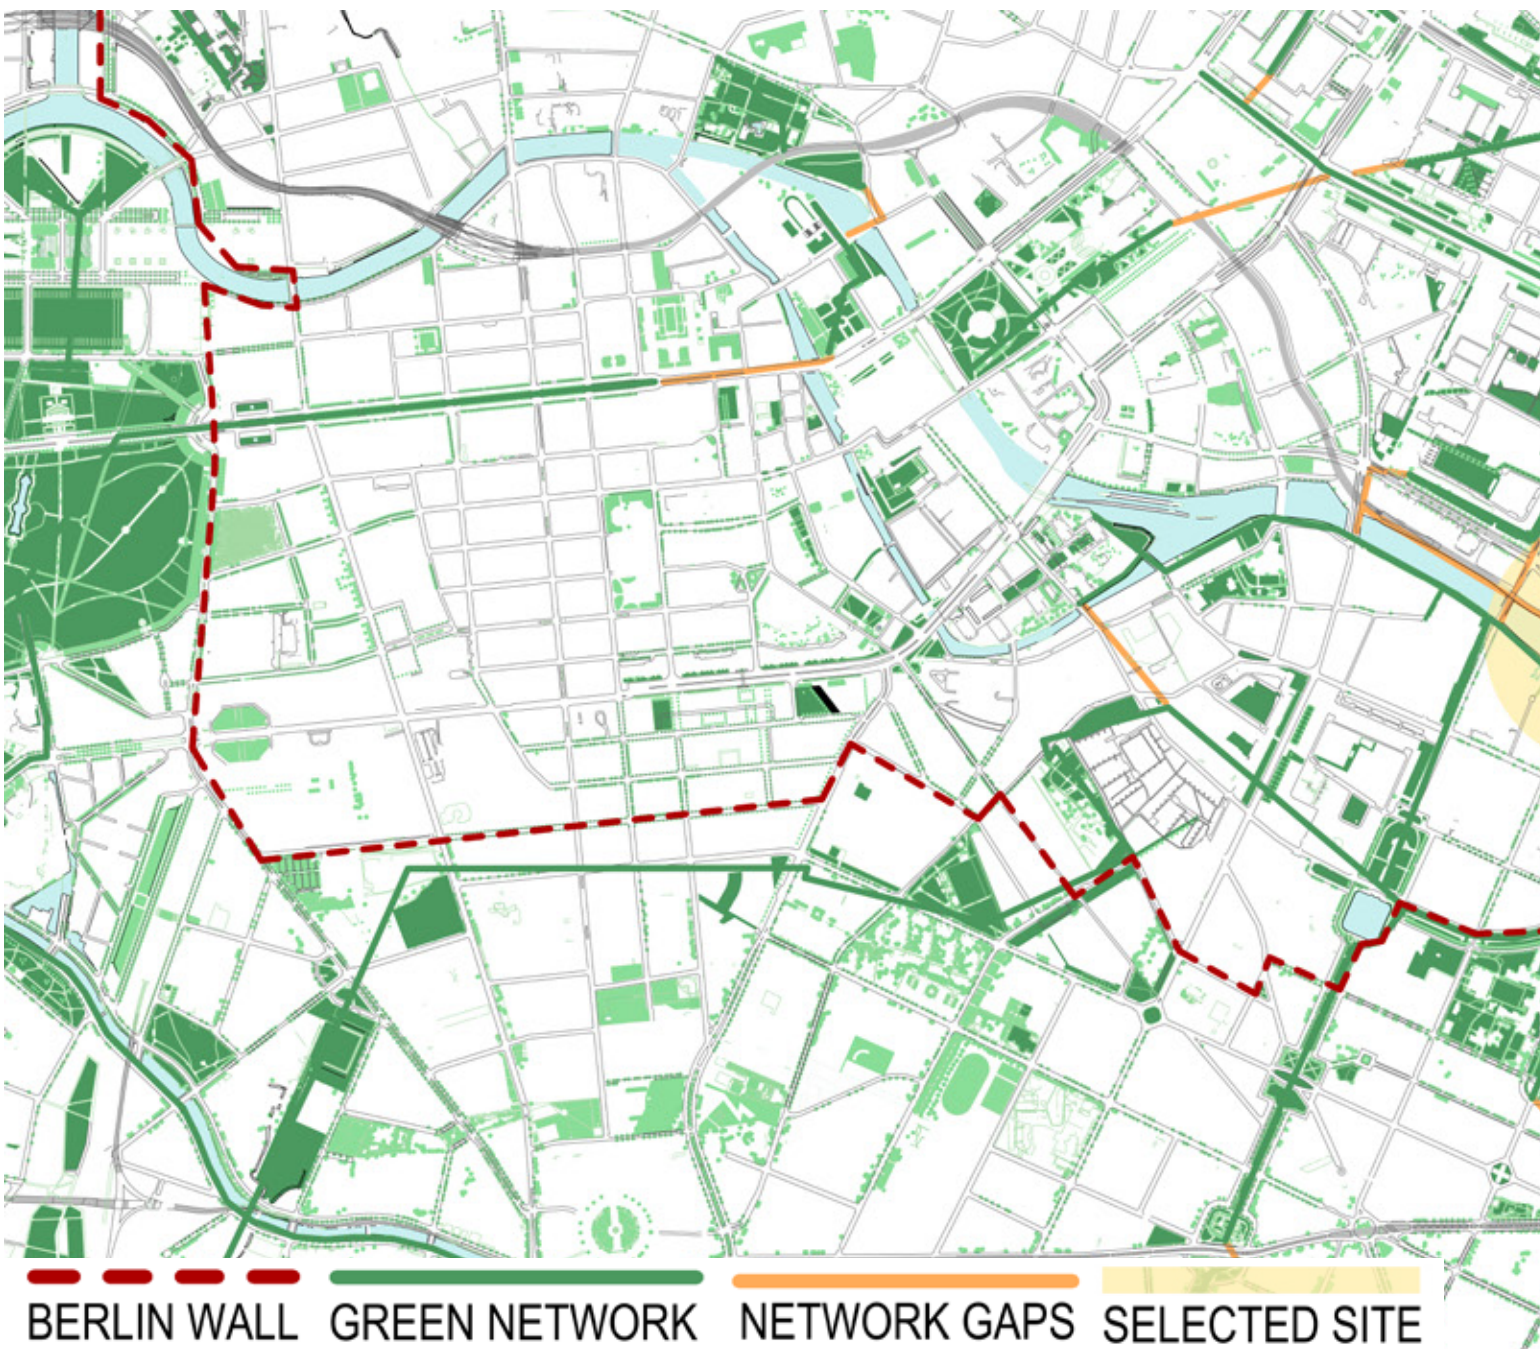

ARCH 301 [COMMERCIAL]

Prepared Food Market and Community
Center, Sara D. Roosevelt Park
Manhattan, NY

ARCH 401 [RESIDENTIAL]

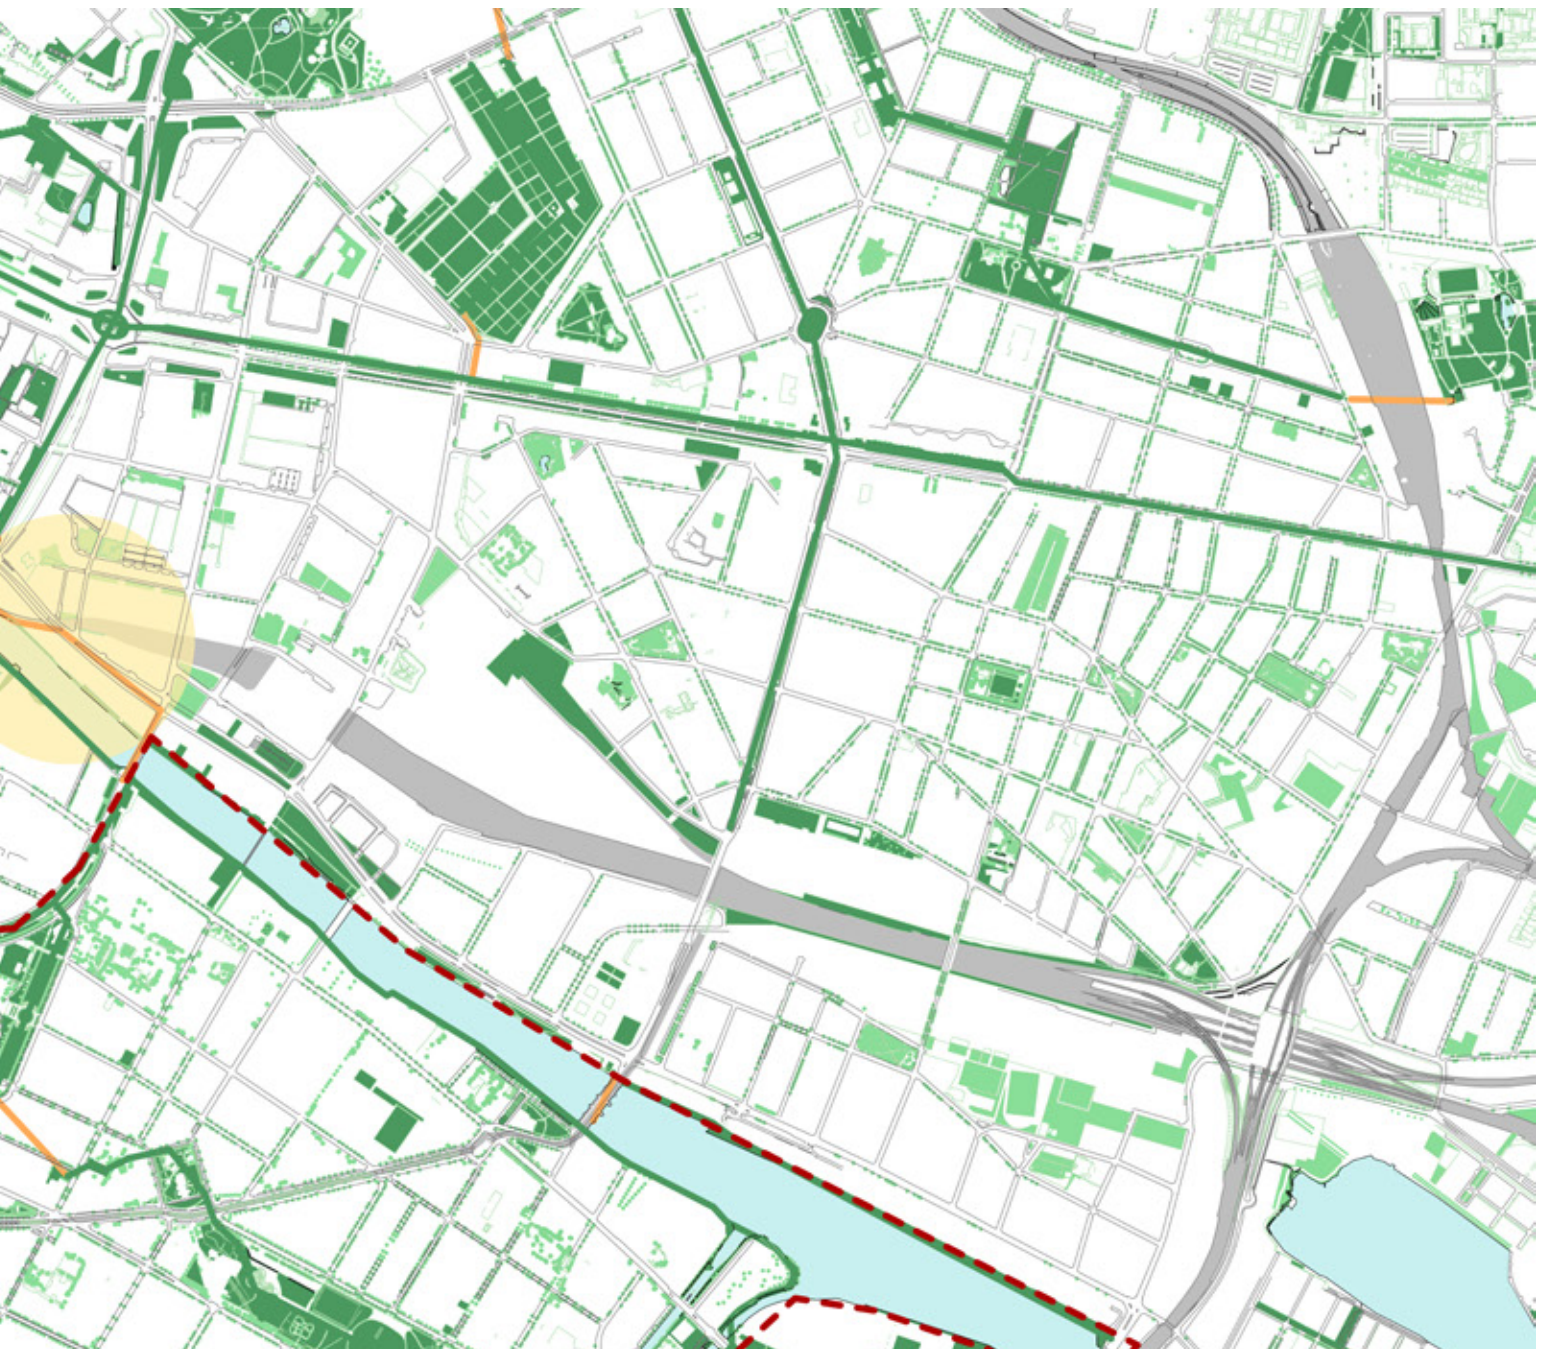

GREEN CONNECTIONS

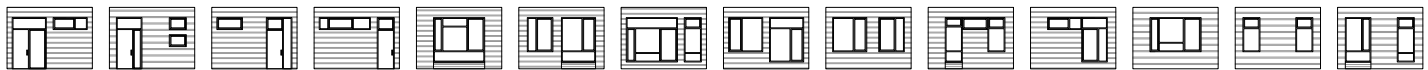

Low Income Housing & Green Development
27 Holzmarktstrasse, Mitte
Berlin, Germany

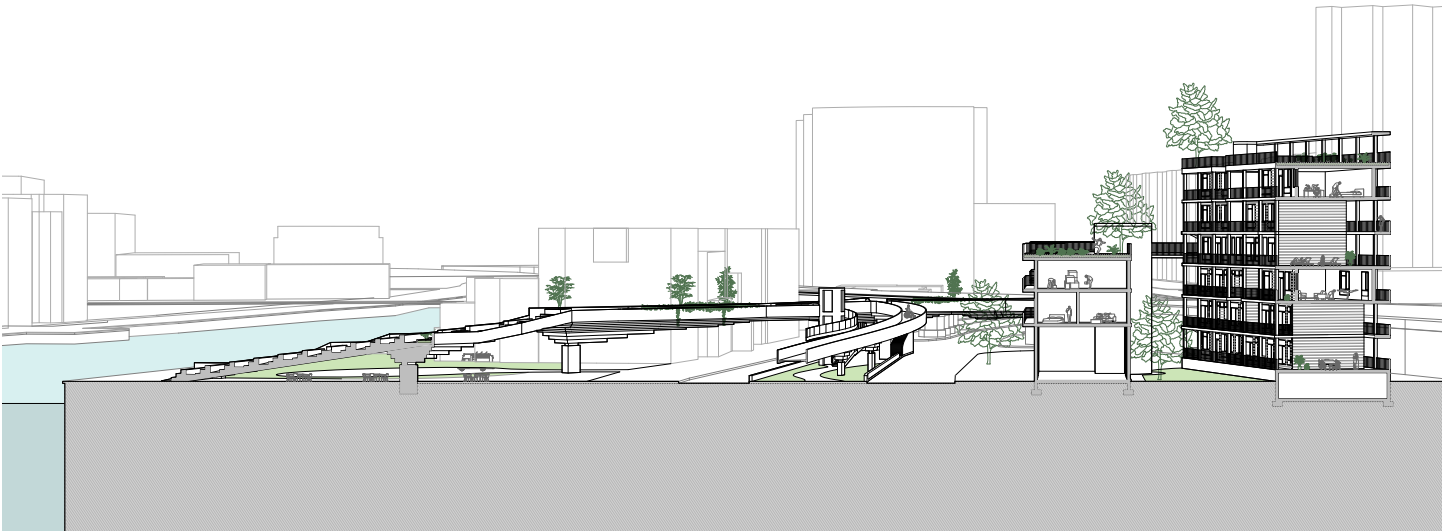

OBJECTIVES:

- Connect Gaps in Berlin's network of parks and trails through accessible pedestrian bridges and bike paths.
- Create social housing for low-income residents with customizable apartment floor plans and facades.
- Reduce carbon emissions with a primarily timber structure and productive rooftop gardens.

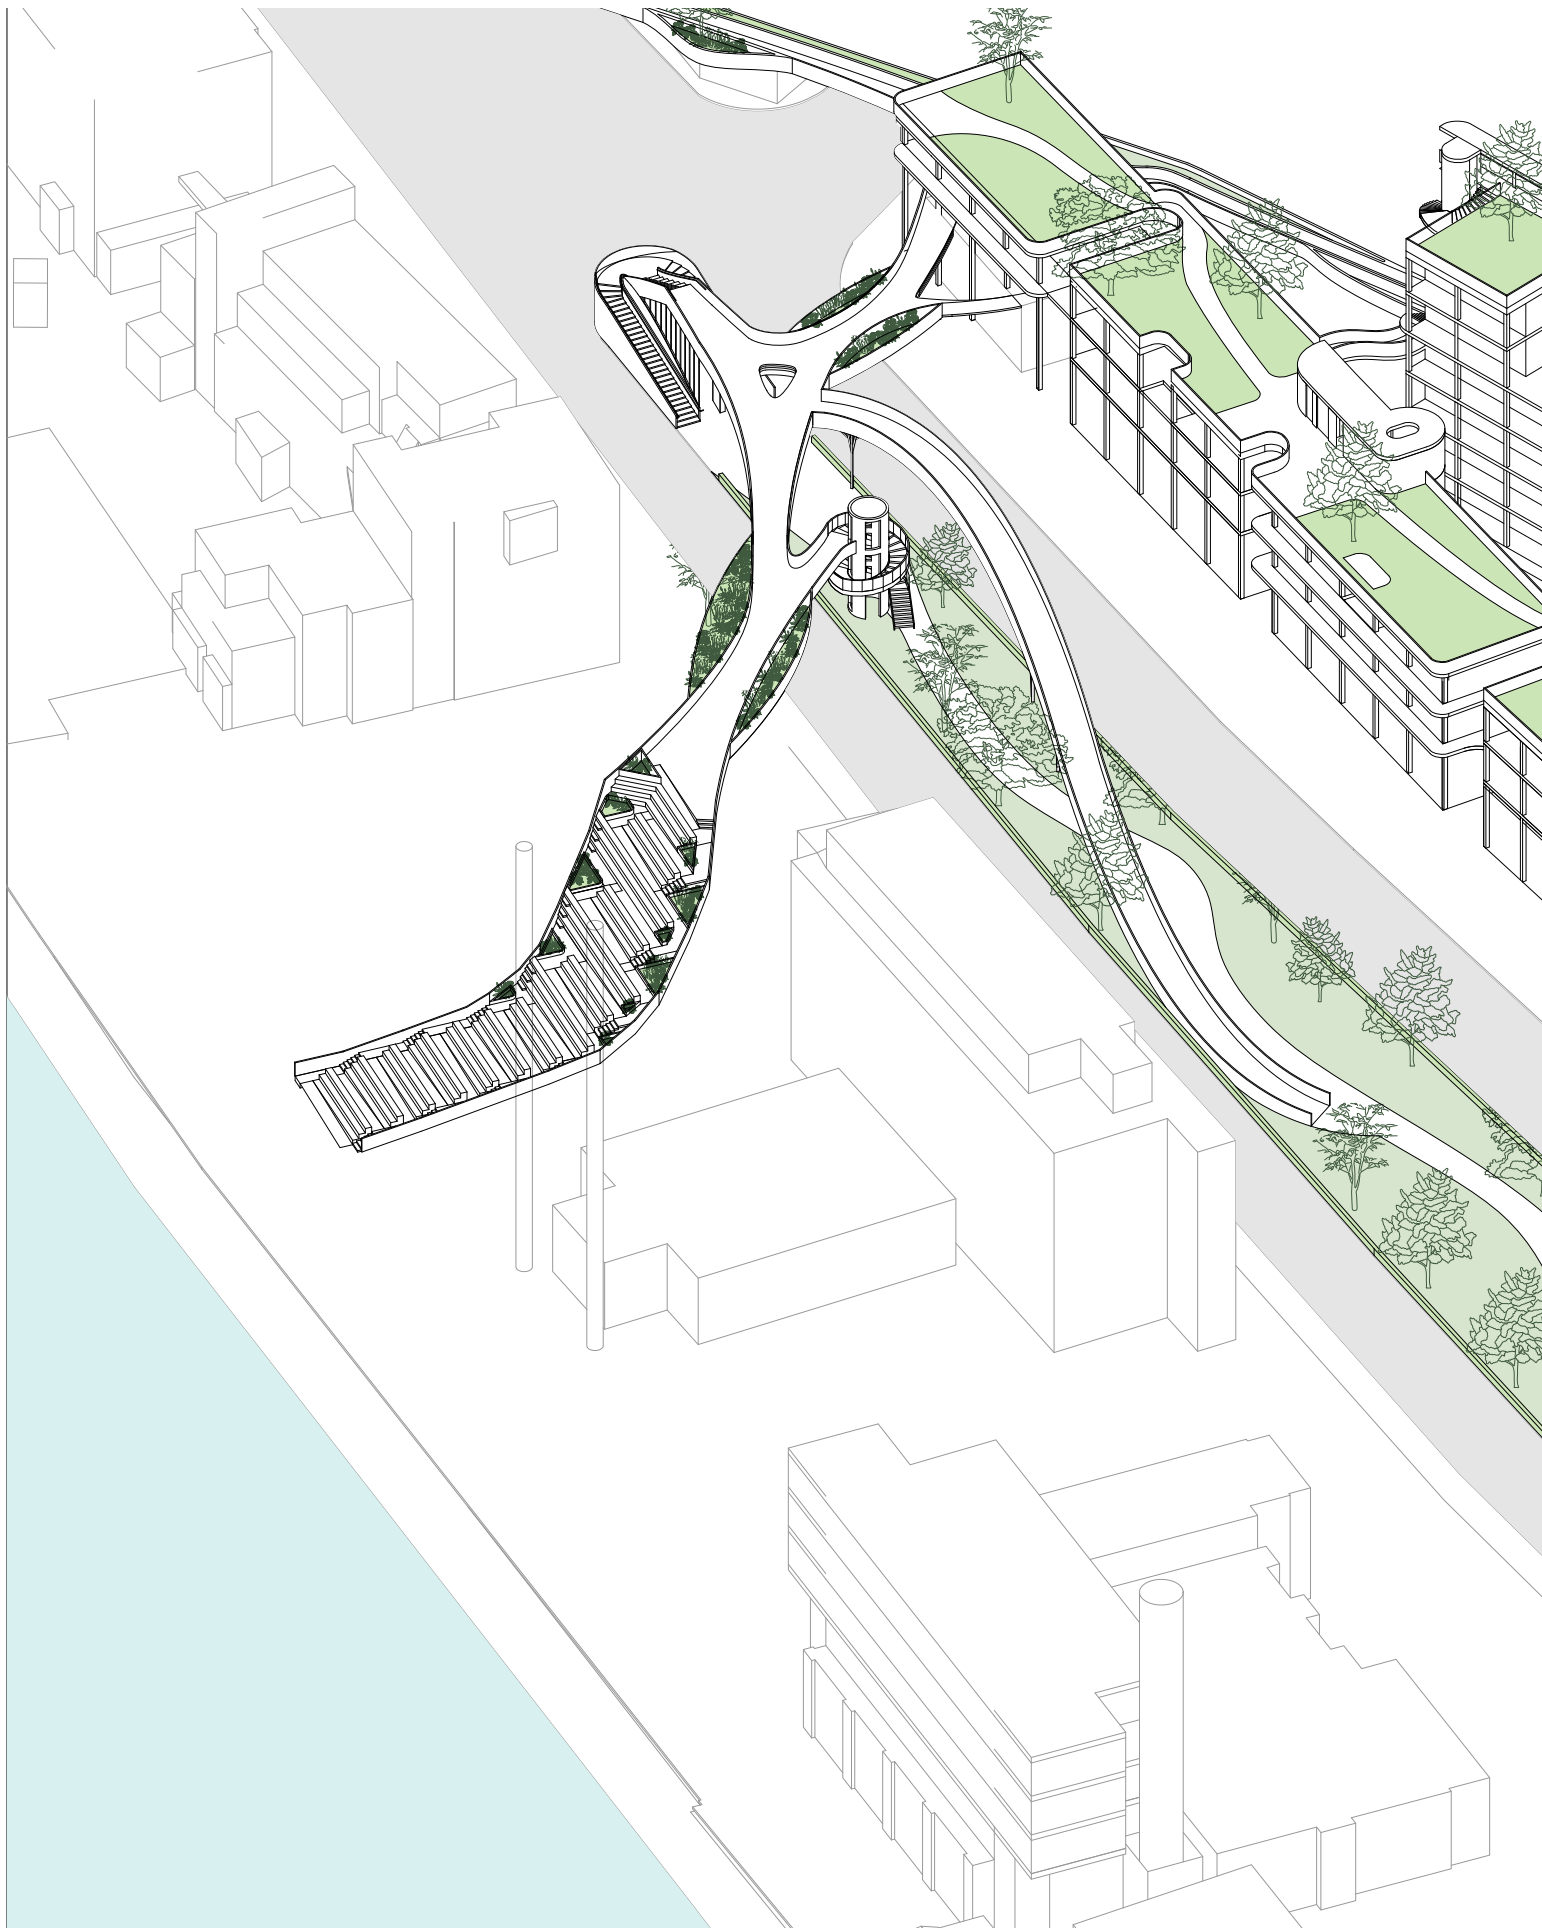

ACADE OPTIONS

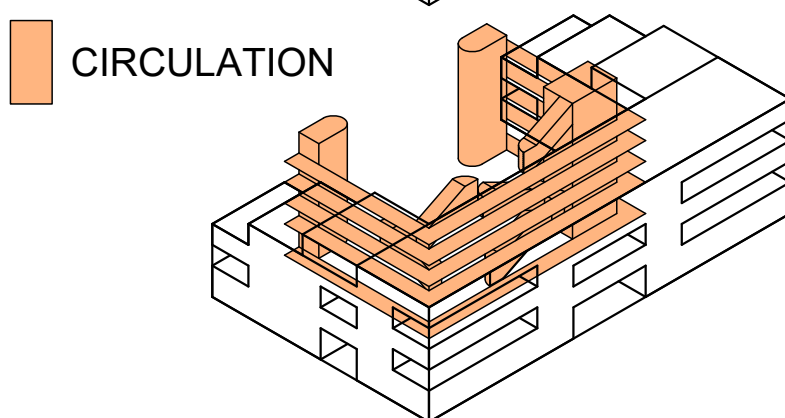

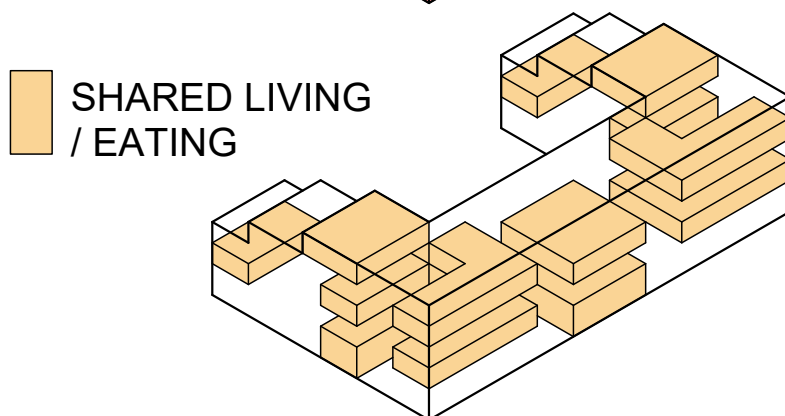

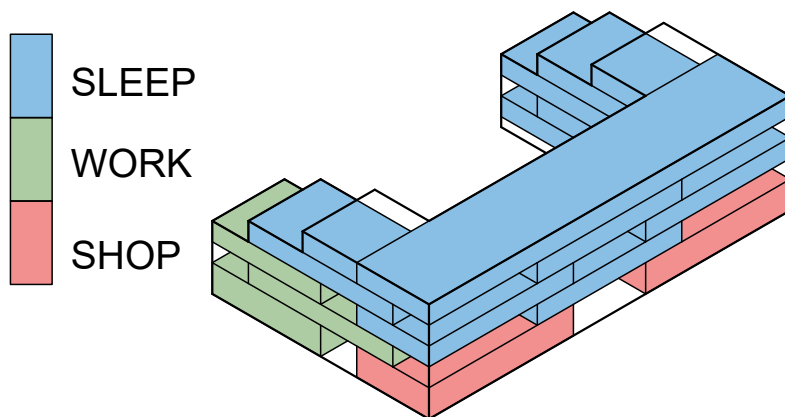

ARCH 302 [MIXED USE]

EYES ON THE STREET

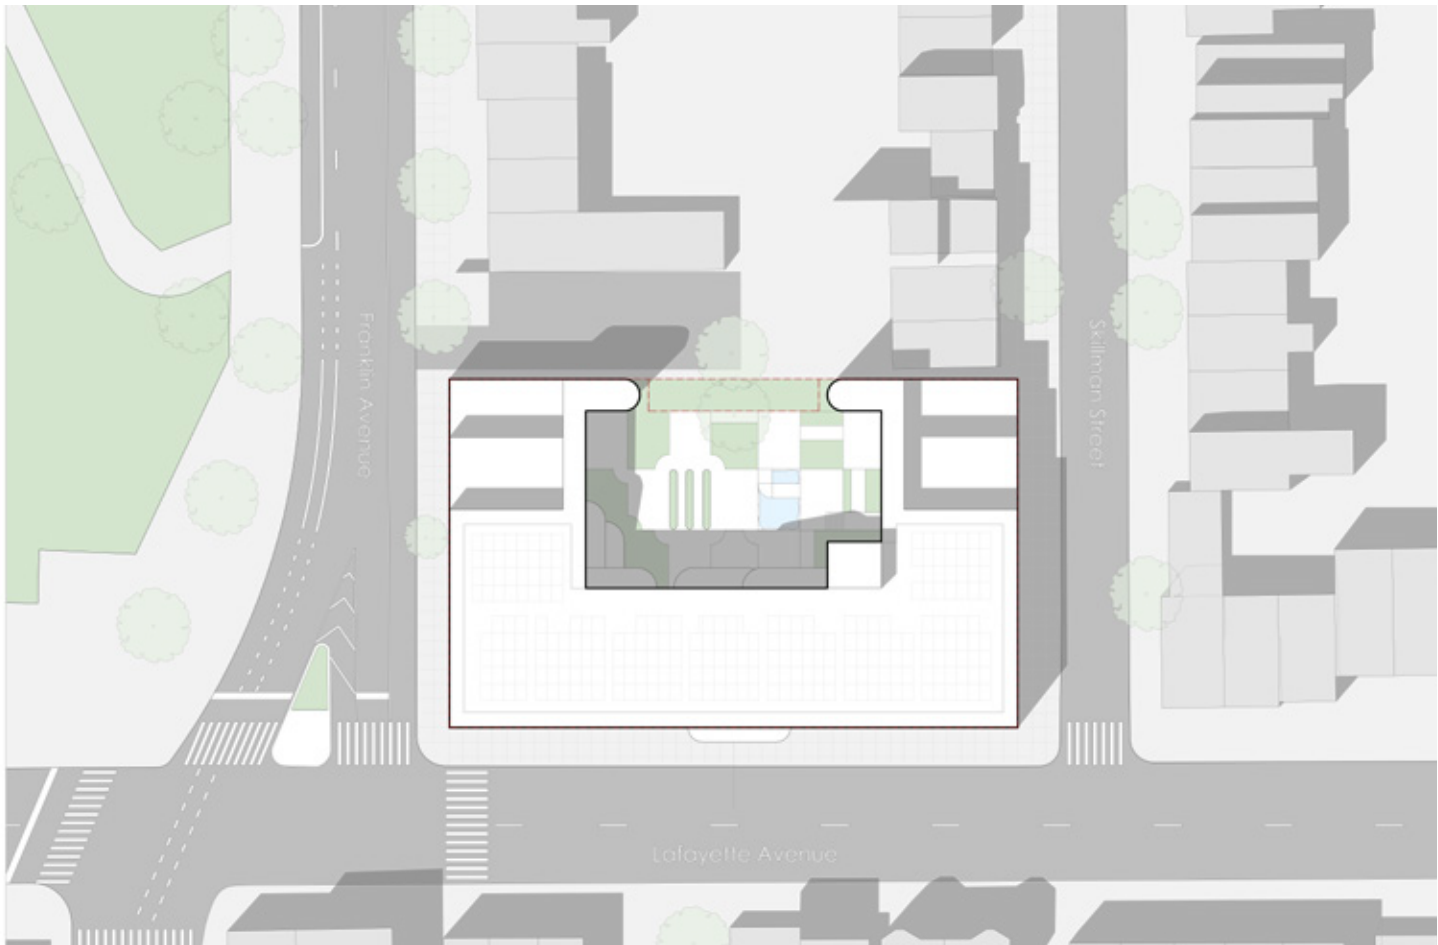

5-Story Artisan Working/Living Community
Bed-Stuy - Brooklyn - NY

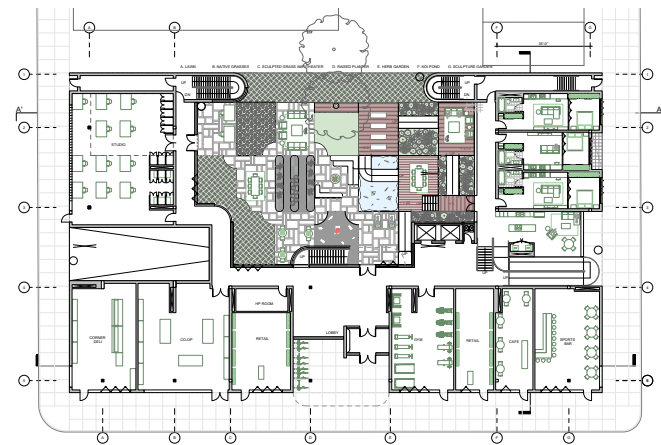

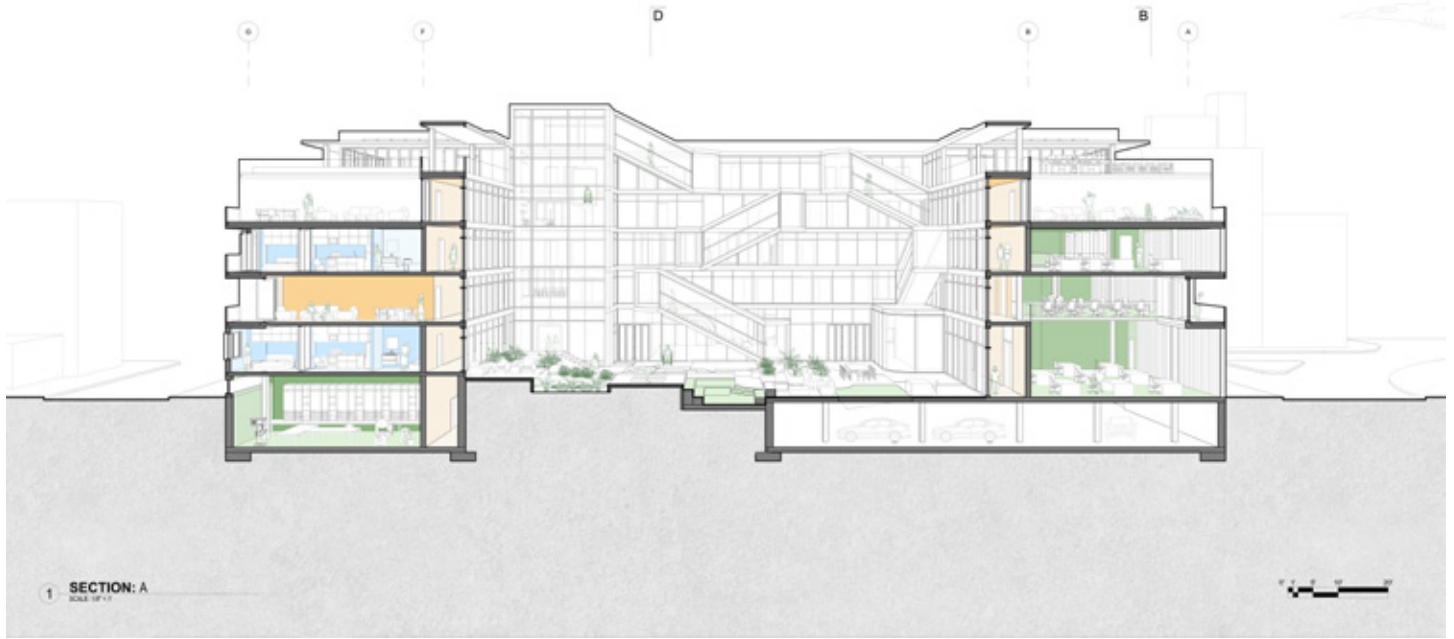

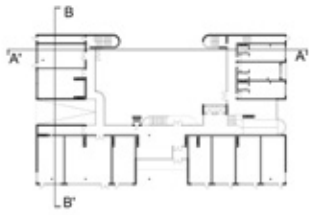

In Collaboration with Tonya Andreeva

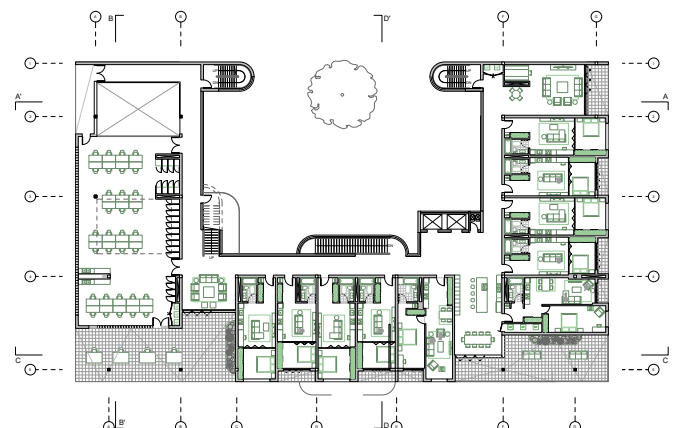

OBJECTIVES:

- Combination of micro units, 1 Bed, and 2 Bed apartments
- Emphasis on shared living and dining on every floor to reduce apartment SQFT and promote resident interaction
- Clear divide between open public areas and closed private areas
- Street views from units to reduce crime and build community with the neighborhood

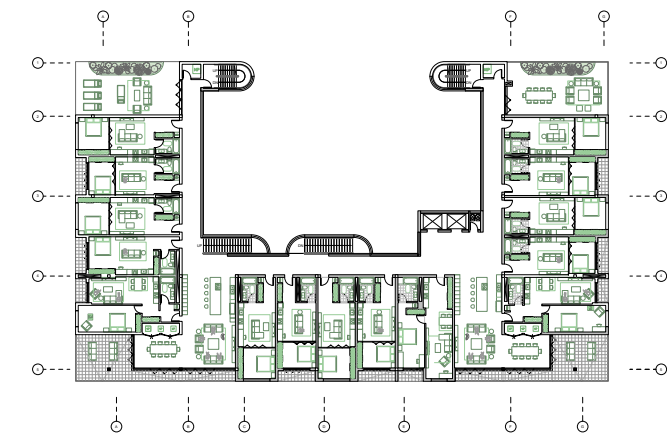

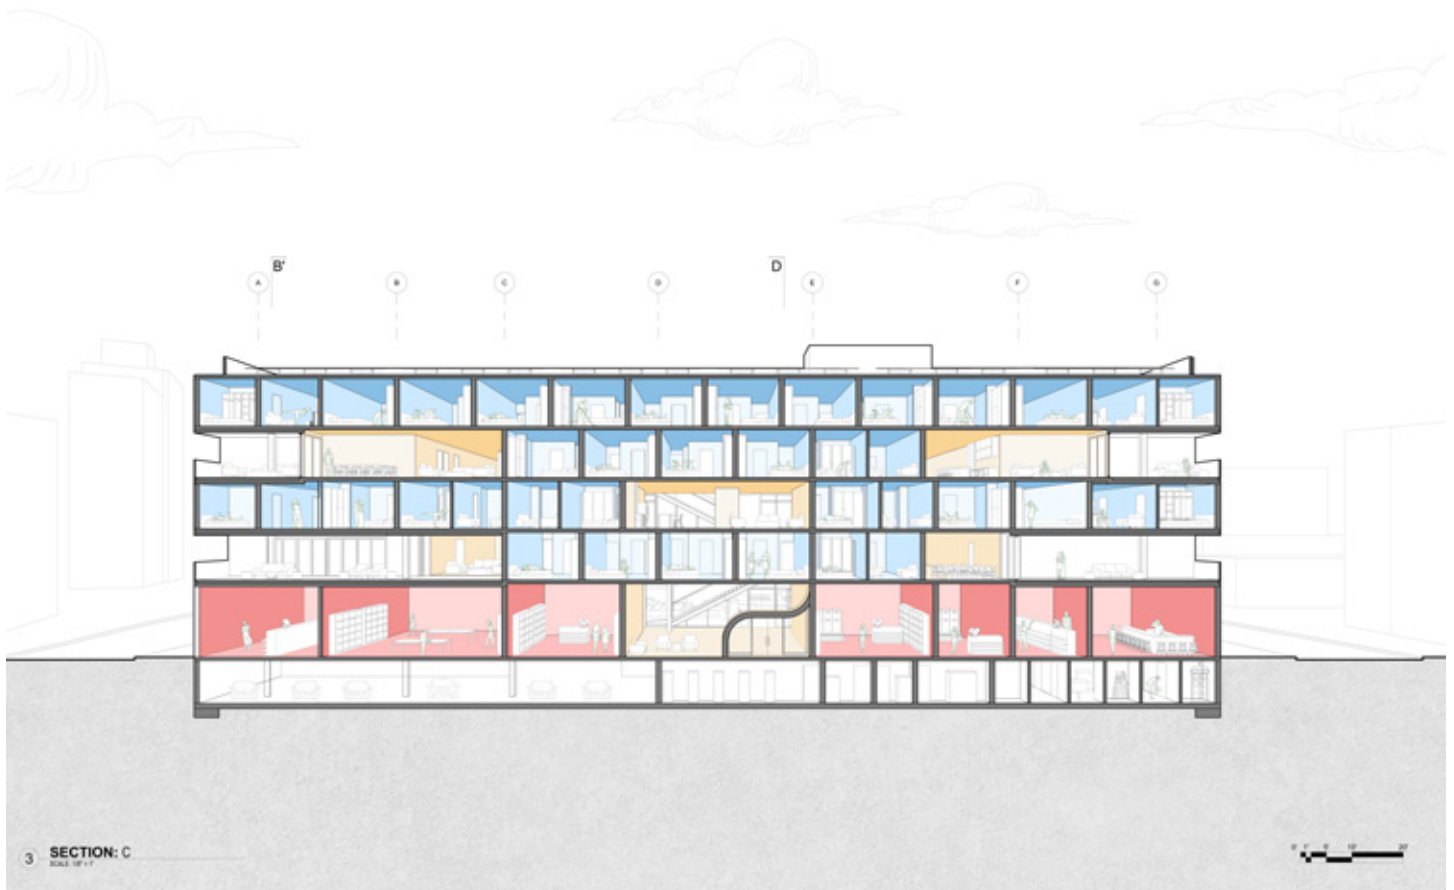

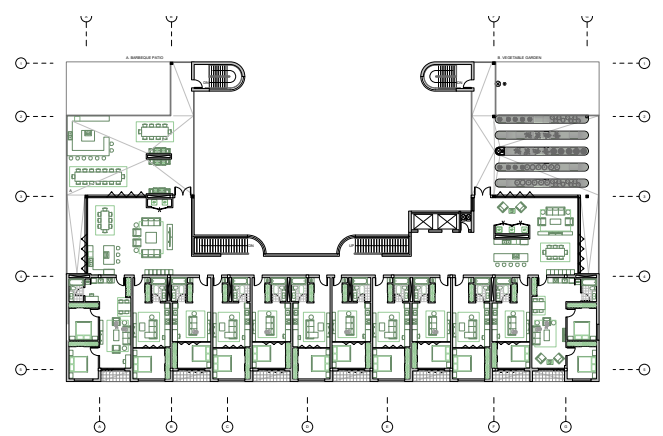

FLOOR 2

FLOOR 2

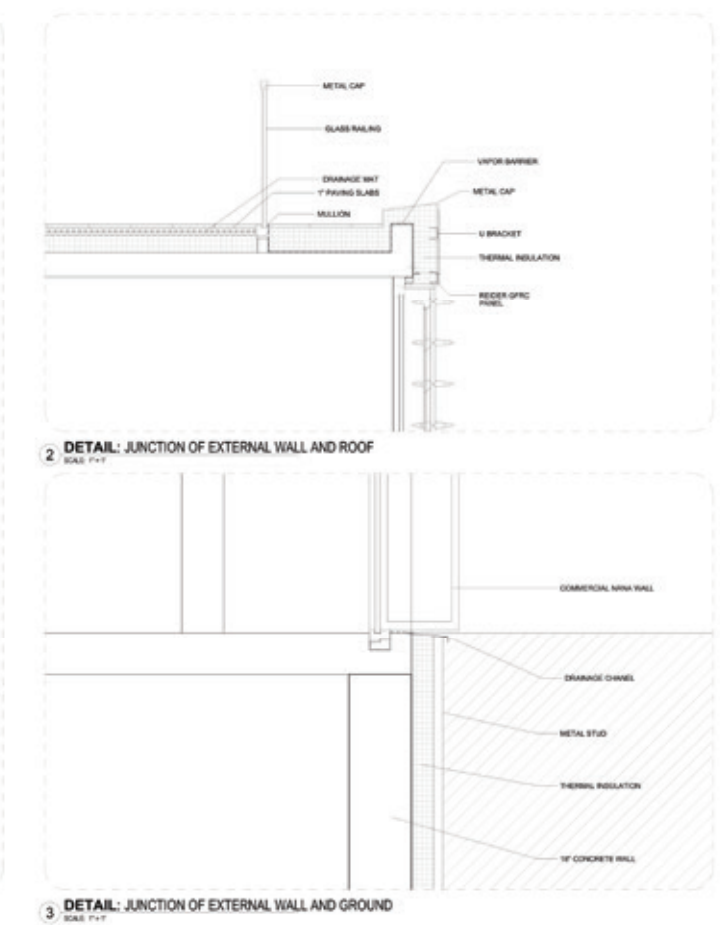

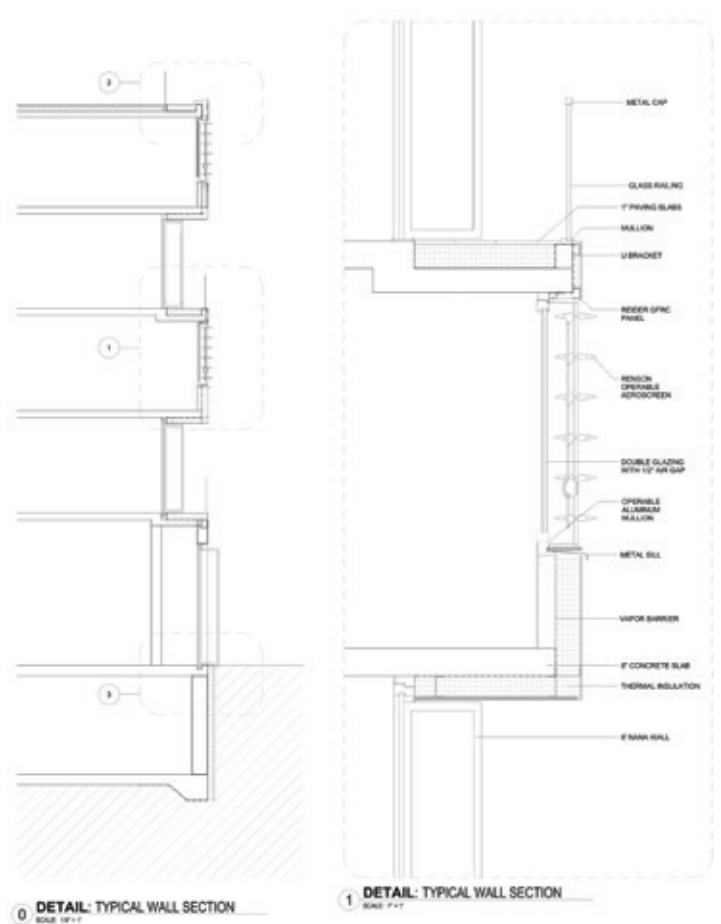

FLOOR 4

FLOOR 5

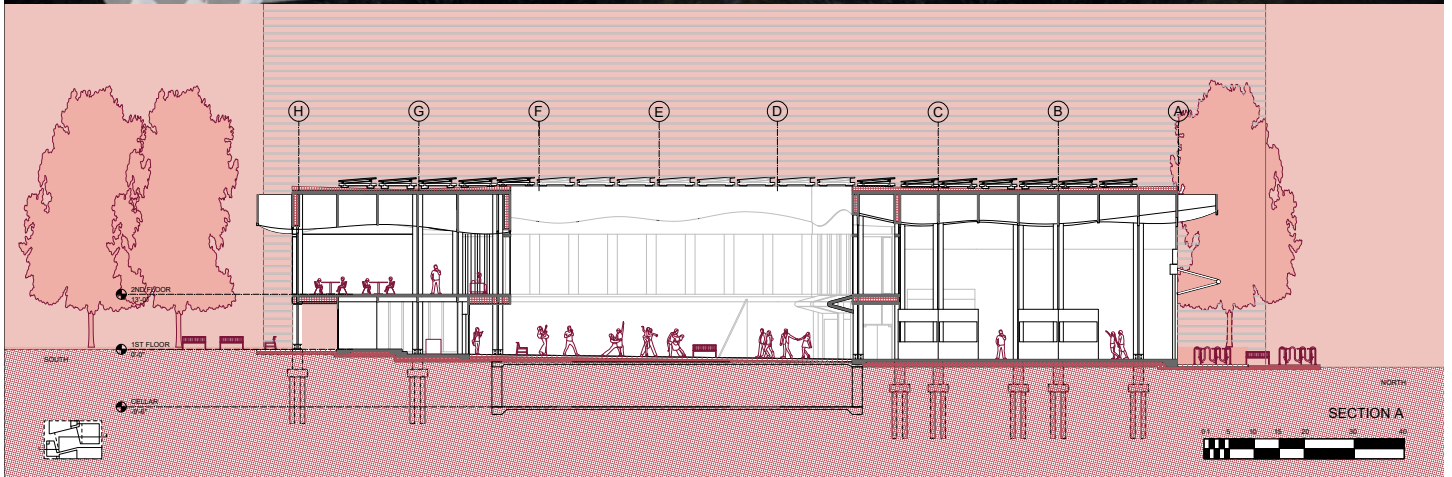

Project 03 [COMMERCIAL]

INTERSECTING HARMONY

Prepared Food Market and Community Center

In collaboration with Selena Quinones – Manhattan, NY

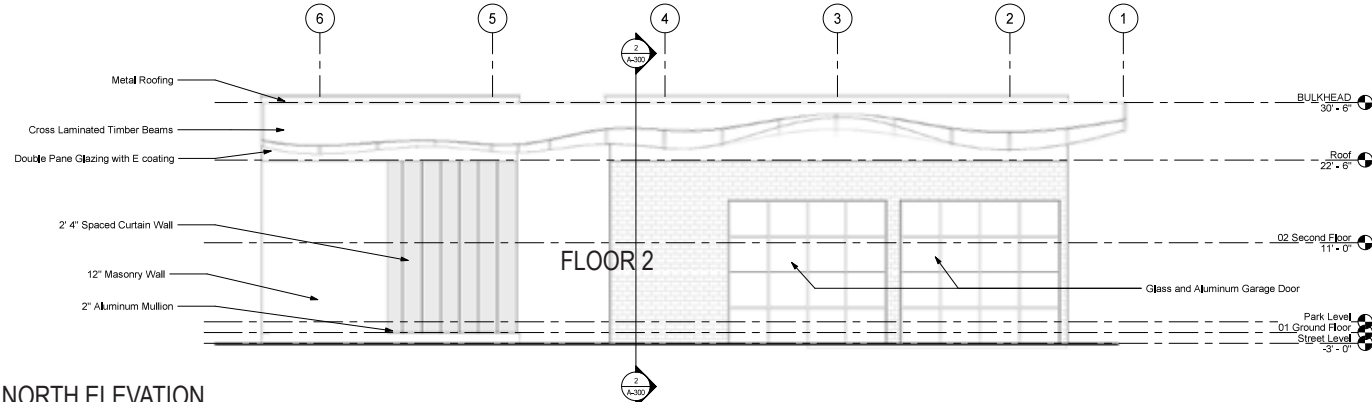

Objectives:

- Revitalize the north end of Sara D. Roosevelt park and reconnect with the surrounding residents.
- Foster connections between the diverse but disconnected communities that border the park by providing a platform for local food vendors.
- Create a courtyard oasis from the city and a community hub to center outdoor programming throughout the year.
- The facade is a blank canvas for graffiti to fosters inclusivity where people feel welcomed and connected to the space.
- Unite the building under one roof composed of an undulating grid of beams and reflects circulation patterns. The curves are designed around the general circulation through the site.
- Use a timber structure to reduce costs and environmental footprint while connecting with existing trees.

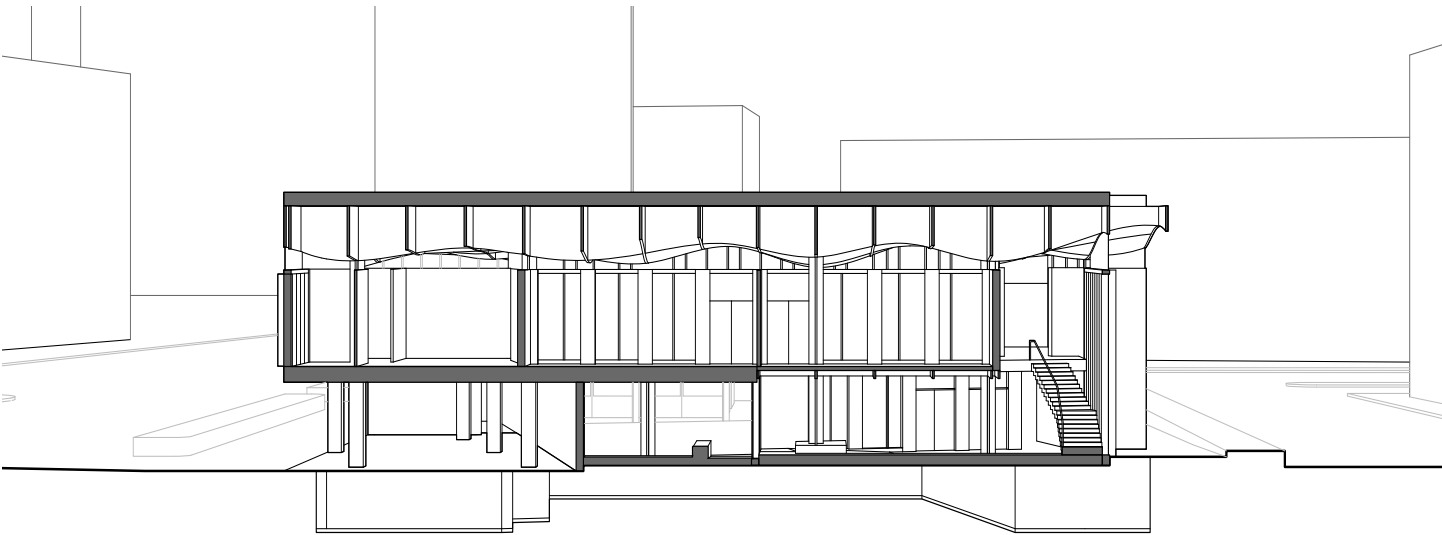

My contributions included plans, sections, roof design, programming, and courtyard design.
